Download Brush Fonts For Photoshop HOT

Want to get rid of that annoying Office 2011 update? If you've already installed the latest version of Office 2013, chances are you haven't noticed that you've also got Office 2011 installed. Neither version of Microsoft Office is perfect, but they both have their benefits.

Luckily, Microsoft does have a solution to the problem. There is a free tool that will allow you to remove Office 2011 without losing any of your data or settings. Although you can use this tool to remove Office 2011, doing so will also remove the updates to Office 2013, so it's best to install the latest version of Office 2013 after you've installed the tool to remove Office 2011.

To remove Office 2011, all you need to do is open the Windows Control Panel, go to Programs and Features, then look for Office 2011.

Select the program and open the Uninstall button.
